About the Dataset

Description In developing countries where many people living in rural areas are low-literate learners, mobile phones represent an important new way by which educational content can be effectively and easily delivered in different languages and conveyed in the form that is pictorial and spoken rather than written. A field experiment was conducted in Burkina Faso in 2012-2013 by researchers funded through the USAID supported Dry Grain Legumes CRSP to explore the effectiveness of mobile phone-based animated videos to deliver knowledge and information about two post-harvest technologies (solar treatment and triple bag storage method) to low-literate adult farmers. This dataset is an output of the survey of farmers, extension agents, and village leaders who participated in the training activities using the mobile phone based method and the traditional extension approach to evaluate the effectiveness of these two alternate extension approaches in inducing learning and adoption outcomes among cowpea growing farmers in rural Burkina Faso.

Sampling The field experiment was implemented in 48 villages across 3 districts each from two provinces—Passore and Sourou. The six districts are: Yako, Samba and Arbolle from Passore and Toeni, Tougan and Kiambara from Sourou. Each district was under the leadership of one extension agent. Eight villages were randomly selected from each of the 6 districts and then 2 villages per district were randomly assigned to Treatment 1A (video based training and storage bags available in the village), 1B (video based training and storage bags available at the extension agent’s office), 2A (traditional extension training and storage bags available in the village), and 2B (traditional extension training and storage bags available at the extension agent’s office). Baseline data on prior knowledge (i.e., pre-treatment) about the storage techniques and exposure to the two technologies were collected from 20 randomly selected participants in each village who attended the training session. A follow-up survey was conducted for a sub set of 12 farmers per village who were selected randomly from the list of 20 farmers who attended the training/demonstration sessions (i.e., those who received the treatment) and had completed the pre-treatment knowledge module.

Method: The pre-treatment and follow up surveys were conducted by interviewing the farmer who had attended the training sessions. The interview was based on a structured questionnaire, which was translated into French and administered in local language. The questionnaire collected information on the trainee (i.e. respondent) and household characteristics, cowpea production and storage practices, and farmers’ knowledge, perception and opinion about cowpea grain storage techniques. The survey was conducted by trained extension agents with technical support and supervision by researchers from INERA and Michigan State University. In addition to farmer surveys, record keeping data on the sales of the plastic bags by the village chief or extension agents, number of video downloads, and community level survey data were also collected across all 48 villages.

Effectiveness and Impact of Mobile Phone based Extension Methods to Disseminate Solar Treatment and Triple Bag Technology for Cowpea in Burkina Faso

Overview

Type	Edited, anonymous dataset for public distribution
Identification	N/A
Version	v01
Kind of Data	Sample survey data [ssd], record keeping data
Unit of Analysis	Trainee farmers, villages, farmers who purchased plastic bags or downloaded videos
Language	Survey was implemented in French
Questionnaires	Available in English

Scope & Coverage

Time Period(s)	2012-13
Countries	Burkina Faso
Regional coverage:	Six districts from two provinces in Burkina Faso – Yako, Samba and Arbolle from Passore and Toeni, Tougan and Kiambara from Sourou

Producers & Sponsors

Primary Investigator(s)	Mywish Maredia, Barry Pittendrigh and Julia Bello-Bravo, Michigan State University; Malick Ba and Clementine Dabire, INERA; Byron Reyes, CIAT
Funding Agency/ies	U.S. Agency for International Development (USAID)

Data Collection

Data Collection Dates	start Nov 3, 2012; end Jan 24, 2013
------------------------------	-------------------------------------

Accessibility

Citation Requirements

Use of the dataset must be acknowledged using a citation which would include:

- the Identification of the Primary Investigator
- the title of the survey (including country, acronym and year of implementation)
- the survey reference number
- the source and date of download

Variables Description

Dataset contains 187 variable(s)

File : 1_farmer_attendance_data

regid: region ID

Information [Type= discrete] [Format=numeric] [Range= 1-2] [Missing=*]

Statistics [NW/ W] [Valid=1392 /-] [Invalid=0 /-]

Value	Label	Cases	Percentage
1	boucle du mouhoun	733	52.7%
2	nord	659	47.3%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

provid: province ID

Information [Type= discrete] [Format=numeric] [Range= 1-2] [Missing=*]

Statistics [NW/ W] [Valid=1392 /-] [Invalid=0 /-]

Value	Label	Cases	Percentage
1	sourou	733	52.7%
2	passore	659	47.3%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

deptid: department ID

Information [Type= discrete] [Format=numeric] [Range= 101-209] [Missing=*]

Statistics [NW/ W] [Valid=1392 /-] [Invalid=0 /-]

Value	Label	Cases	Percentage
101	tougan	284	20.4%
103	kiembara	249	17.9%
107	toeni	200	14.4%
201	samba	226	16.2%
208	arbolle	208	14.9%
209	yako	225	16.2%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

villageid: village of training

Information [Type= continuous] [Format=numeric] [Range= 10101-20939] [Missing=*]

Statistics [NW/ W] [Valid=1392 /-] [Invalid=0 /-] [Mean=15203.108 /-] [StdDev=5136.873 /-]

treatment: treatment group

Information [Type= discrete] [Format=numeric] [Range= 11-22] [Missing=*]

Statistics [NW/ W] [Valid=1392 /-] [Invalid=0 /-]

Value	Label	Cases	Percentage
11	video + sale of plastic in village	350	25.1%
12	video + sale of plastic by ext agent	348	25.0%
21	trad. training + sale of plastic in village	417	30.0%
22	trad. training + sale of plastic by ext agent	277	19.9%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

ea_id: ID of extension agent

Information [Type= discrete] [Format=numeric] [Range= 1-6] [Missing=*]

Statistics [NW/ W] [Valid=1392 /-] [Invalid=0 /-]

File : 1_farmer_attendance_data

ea_id: ID of extension agent

Value	Label	Cases	Percentage
1		208	14.9%
2		200	14.4%
3		225	16.2%
4		249	17.9%
5		284	20.4%
6		226	16.2%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

t0: No.

Information	[Type= continuous] [Format=numeric] [Range= 1-65] [Missing=*]
Statistics [NW/ W]	[Valid=1392 /-] [Invalid=0 /-] [Mean=17.041 /-] [StdDev=12.312 /-]

n1: gender

Information	[Type= discrete] [Format=numeric] [Range= 1-2] [Missing=*]
Statistics [NW/ W]	[Valid=1392 /-] [Invalid=0 /-]

Value	Label	Cases	Percentage
1	male	948	68.1%
2	female	444	31.9%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

n2: age

Information	[Type= continuous] [Format=numeric] [Range= 1917-2000] [Missing=*]
Statistics [NW/ W]	[Valid=1392 /-] [Invalid=0 /-] [Mean=1970.779 /-] [StdDev=12.931 /-]

n2n: age (years)

Information	[Type= continuous] [Format=numeric] [Range= 12-95] [Missing=*]
Statistics [NW/ W]	[Valid=1392 /-] [Invalid=0 /-] [Mean=41.221 /-] [StdDev=12.931 /-]

n3: can he/she read?

Information	[Type= discrete] [Format=numeric] [Range= 1-2] [Missing=*]
Statistics [NW/ W]	[Valid=1392 /-] [Invalid=0 /-]

Value	Label	Cases	Percentage
1	yes	300	21.6%
2	no	1092	78.4%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

n5: name of the neighborhood where farmer resides (1=same as training vlg)

Information	[Type= discrete] [Format=numeric] [Range= 1-1] [Missing=*]
Statistics [NW/ W]	[Valid=1392 /-] [Invalid=0 /-]

Value	Label	Cases	Percentage
1		1392	100.0%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

x1a: month of training

Information	[Type= discrete] [Format=numeric] [Range= 11-11] [Missing=*]
Statistics [NW/ W]	[Valid=1392 /-] [Invalid=0 /-]

File : 1_farmer_attendance_data

x1a: month of training

Value	Label	Cases	Percentage
11		1392	100.0%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

x1b: day of training

Information [Type= discrete] [Format=numeric] [Range= 3-13] [Missing=*]

Statistics [NW/ W] [Valid=1392 /-] [Invalid=0 /-]

Value	Label	Cases	Percentage
3		203	14.6%
4		156	11.2%
5		213	15.3%
6		142	10.2%
7		131	9.4%
8		162	11.6%
9		144	10.3%
10		25	1.8%
11		56	4.0%
12		139	10.0%
13		21	1.5%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

x1c: year of training

Information [Type= discrete] [Format=numeric] [Range= 2012-2012] [Missing=*]

Statistics [NW/ W] [Valid=1392 /-] [Invalid=0 /-]

Value	Label	Cases	Percentage
2012		1392	100.0%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

treatment1: treatment groups video (=1) and traditions (=0)

Information [Type= discrete] [Format=numeric] [Range= 0-1] [Missing=*]

Statistics [NW/ W] [Valid=1392 /-] [Invalid=0 /-]

Value	Label	Cases	Percentage
0		694	49.9%
1		698	50.1%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

cb4a: is there a bus service in this village?

Information [Type= discrete] [Format=numeric] [Range= 1-2] [Missing=*]

Statistics [NW/ W] [Valid=48 /-] [Invalid=0 /-]

Value	Label	Cases	Percentage
1	yes	7	14.6%
2	no	41	85.4%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

cb4b: if yes, how often do the bus stop in the village?

Information [Type= discrete] [Format=numeric] [Range= 1-3] [Missing=*]

Statistics [NW/ W] [Valid=7 /-] [Invalid=41 /-]

Value	Label	Cases	Percentage
1	every day	5	71.4%
2	several times a week	2	28.6%
3	once a week	0	
Sysmiss		41	

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

File : 2_village_level_survey_data

cb5: condition of the road btw village and town in cb1

Information [Type= discrete] [Format=numeric] [Range= 1-88] [Missing=*]

Statistics [NW/ W] [Valid=48 /-] [Invalid=0 /-]

Value	Label	Cases	Percentage
1	dirt with damaged sections (e.g. a lot of holes/interrupted)	29	60.4%
2	dirt in good condition (no holes, functions all year)	10	20.8%
3	asphalt with damaged sections	0	
4	asphalt in good condition	1	2.1%
88	not applicable (if commercial town is the same village)	8	16.7%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

cb6: km from your village to main paved (asphalt) road

Information [Type= continuous] [Format=numeric] [Range= 0-145] [Missing=*]

Statistics [NW/ W] [Valid=48 /-] [Invalid=0 /-] [Mean=51.313 /-] [StdDev=38.945 /-]

cc3a: is there a govt ag extension service office in this village?

Information [Type= discrete] [Format=numeric] [Range= 1-2] [Missing=*]

Statistics [NW/ W] [Valid=48 /-] [Invalid=0 /-]

Value	Label	Cases	Percentage
1	yes	12	25.0%
2	no	36	75.0%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

cc3b: if no, do ag ext officers regularly (1-2 times/season) visit this village?

Information [Type= discrete] [Format=numeric] [Range= 1-2] [Missing=*]

Statistics [NW/ W] [Valid=36 /-] [Invalid=12 /-]

Value	Label	Cases	Percentage
1	yes	29	80.6%
2	no	7	19.4%
Sysmiss		12	

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

cc4: where to farmers generally obtain farm credit for their crops?

Information [Type= discrete] [Format=numeric] [Range= 0-99] [Missing=*]

Statistics [NW/ W] [Valid=48 /-] [Invalid=0 /-]

Value	Label	Cases	Percentage
0	don't have access to farm credit	32	66.7%
1	village/rural banks	8	16.7%
2	private banks	1	2.1%
3	cotton or other agricultural companies	0	
4	NGOs	1	2.1%
5	government's farm banks	4	8.3%
99	other (specify)	2	4.2%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

cc4s: other cc4

Information [Type= discrete] [Format=character] [Missing=*]

File : 2_village_level_survey_data

cc4s: other cc4

Statistics [NW/ W] [Valid=2 /-] [Invalid=0 /-]

Value	Label	Cases	Percentage
caisse populaire		2	100.0%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

cd1: is there any permanent input dealer in this village?

Information [Type= discrete] [Format=numeric] [Range= 1-2] [Missing=*]

Statistics [NW/ W] [Valid=48 /-] [Invalid=0 /-]

Value	Label	Cases	Percentage
1	yes	5	10.4%
2	no	43	89.6%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

cd2: if yes, do farmers generally purchase fertilizer and pesticides at this dealer?

Information [Type= discrete] [Format=numeric] [Range= 1-2] [Missing=*]

Statistics [NW/ W] [Valid=5 /-] [Invalid=43 /-]
